

Supporting a groundswell of community commitment to wellness - Johnston Run Streamside Trail

The Mercersburg area is on the cusp of a remarkable opportunity to become more vibrant, active, and connected. From our 2012 MPMC Feasibility Study of walkability/bikeability, a key first project is building a trail that "repurposes" the old Tannery Property on Johnston Run stream bank. This will be a handicap accessible trail for walkers, strollers, and cyclists. Everyone is invited to join this project through donations and volunteering.
